

HEBER PUBLIC UTILITY DISTRICT

REPORT TO BOARD OF DIRECTORS

MEETING DATE: November 20, 2025

FROM: Madeline Dessert, General Manager

SUBJECT: Desert Valley Power Systems Report

Background:

Heber Public Utility District contracts with Desert Valley Power Systems for routine servicing and maintenance of district generators. Services include scheduled inspections, oil and filter changes, load testing, and emergency repairs to ensure reliable operation during power interruptions. Desert Valley Power Systems provides timely service, detailed maintenance reports, and professional technical support. Their work helps maintain critical infrastructure readiness, supports operational continuity, and keeps all generators in compliance with manufacturer and safety standards.

Fiscal Impact:

Should the board authorize the General Manager to sign an agreement with Desert Valley Power Systems the fiscal impact will be as follows:

Service Rates		
Regular Labor	\$ 181.50	per hour
Overtime Labor Rate	\$ 220.00	per hour
Regular Travel Rate	\$ 207.90	per hour
Overtime Travel Rate	\$ 242.00	per hour
Mileage Rate (Anything over 20 miles)	\$ 0.67	per mile
After Hours Call Out Rate	\$ 275.00	Call Out Fee / 4 Hr Min

Action Item:

Authorize the General Manager to sign an agreement with Desert Valley Power Systems.

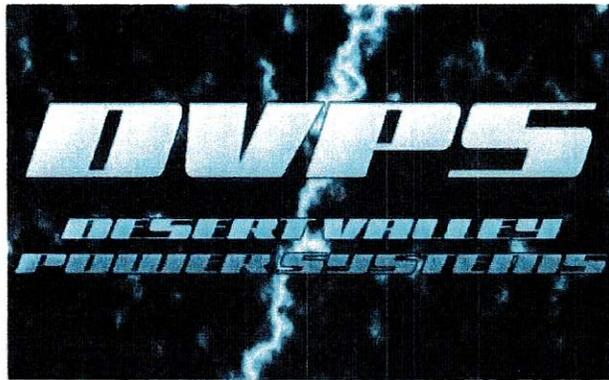

Do not authorize the General Manager to sign an agreement with Desert Valley Power System and give direction to staff.

Respectfully,

Madeline Dessert

HEBER PUBLIC WORKS

Description of Services Offered

Complete Oil Service

Replacement of all oil fluids, oil, and fuel filters. Includes a system inspection along with oil and coolant sample testing. This service is recommended once a year.

2-hour Load Test

Gen-Set load test is usually a 2-hour test which consists of the following 30 mins @ 25%, 30 mins @ 50% and 1 hour @ 80% of the generator name plate rating. Tests are also performed as per client's request or application. This test helps to identify any problems or issues before they happen.

System Inspection

A unit inspection of controls, engine components, and electrical systems of the generator set. Includes checking all fluid levels, oil and coolant, and testing of auto and safety controls. This service is recommended quarterly.

Transfer Switch Test and Inspection

With the client's approval we can perform a loaded transfer switch test. This tests time delays and detects any issues before they occur in an emergency. We also take amperage, voltage drop, and infrared temp readings.

Fuel Sample Testing

Fuel Sample testing as per client's request and needs. We also provide refueling for the standby units.

24/7 Service Calls

We are on call 24 hours a day to provide services to any emergency needs that might arise.
