BATTERIES ARE **NOT ALLOWED** IN YOUR WASTE OR RECYCLING CONTAINERS

An estimated 65% of fires reported at 26 waste facilities throughout California last year were caused by batteries. Improper disposal of batteries have caused millions of dollars of damage to trash collection vehicles and facility equipment.

All batteries, including lithium-ion batteries, are considered hazardous waste in California when they are discarded. This includes all batteries of sizes **AAA, AA, C, D, button cell, 9 Volt**, both rechargeable and single use. All batteries must be taken to a household hazardous waste disposal facility, a universal waste handler (e.g., storage facility or broker), or an authorized recycling facility.

Rechargeable **lithium-ion batteries** are a technological breakthrough as they hold a lot of energy in a small, lightweight package. **They also have a high potential to explode or catch fire when they overheat, are damaged or are improperly manufactured.**

Please do not throw your batteries away in your trash or recycling containers.

The Imperial Valley Resource Management Agency holds a number of collection events at various locations throughout Imperial County. You can view the list of accepted items and event locations by checking out this link: www.ivrma.org/hazmat.php. For the department's permanent collection centers, see the list on their website.

Recycle them!

Batteries are accepted for recycling at all Imperial County HHW & E-waste collection events.

Lithium ION batteries must be dropped off in a plastic bag or with taped contact points.

<https://www.calrecycle.ca.gov/reducewaste/batteries>

<https://recyclinginternational.com/batteries/battery-campaign-warns-against-the-hidden-dangers-of-disposal/>

There are also local battery drop-off locations nearby at Lowe's and Home Depot stores.

Please visit:

www.call2recycle.org/locator/

LAS BATERÍAS **NO ESTÁN PERMITIDAS EN SUS CONTENEDORES DE RESIDUOS O RECICLAJE**

**UN ESTIMADO DEL 65% DE LOS INCENDIOS REPORTADOS EN 26
INSTALACIONES DE DESECHOS EN CALIFORNIA EL AÑO PASADO
FUERON CAUSADOS POR BATERÍAS. LA ELIMINACIÓN
INADECUADA DE LAS BATERÍAS HA CAUSADO MILLONES
DE DÓLARES EN DAÑOS A LOS VEHÍCULOS DE RECOLECCIÓN
DE BASURA Y AL EQUIPO DE LAS INSTALACIONES.**

Todas las baterías, incluidas las baterías de iones de litio, se consideran desechos peligrosos en California cuando se desechan. Esto incluye todas las pilas de tamaño **AAA, AA, C, D, de botón, de 9 voltios**, tanto recargables como de un solo uso. Todas las baterías deben llevarse a una instalación de eliminación de desechos domésticos peligrosos, un manipulador universal de desechos (por ejemplo, una instalación de almacenamiento o intermediario) o una instalación de reciclaje autorizada.

Las baterías recargables de iones de litio son un avance tecnológico, ya que contienen mucha energía en un paquete pequeño y liviano. **También tienen un alto potencial de explotar o incendiarse cuando se sobrecalientan, se dañan o se fabrican incorrectamente.**

No tire las baterías a la basura o a los contenedores de reciclaje.

La Agencia de Administración de Recursos del Valle Imperial lleva a cabo una serie de eventos de recolección en varios lugares del Condado de Imperial. Puede ver la lista de artículos aceptados y las ubicaciones de los eventos consultando este enlace: www.ivrma.org/hazmat.php. Para conocer los centros de recolección permanentes del departamento, consulte la lista en su sitio web.

¡Recíclalos!

Las baterías se aceptan para su reciclaje en todos los eventos de recolección de desechos electrónicos y HHW del condado de Imperial.

Las baterías de iones de litio se deben dejar en una bolsa de plástico o con los puntos de contacto sellados.

También hay ubicaciones locales de entrega de baterías cercanas en las tiendas Lowe's y Home Depot.

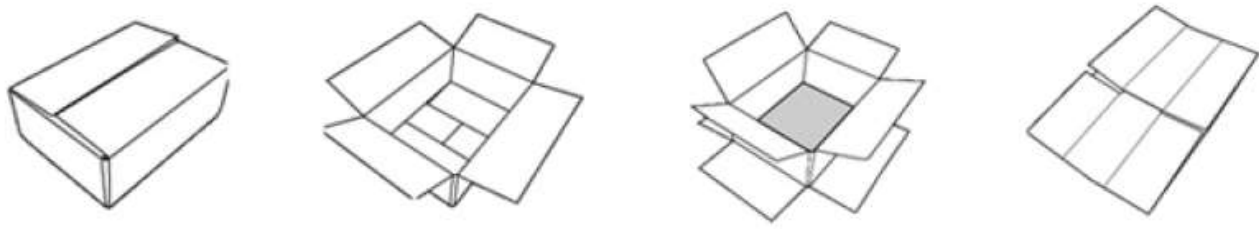

Por favor visite:

www.call2recycle.org/localizador/

<https://recyclinginternational.com/batteries/battery-campaign-warns-against-the-hidden-dangers-of-disposal/>

BEST PRACTICES FOR BREAKING DOWN AND FLATTENING CARDBOARD

It is best practice to break your cardboard down to optimize the space in your container(s) and reduce the amount of pickups your business requires. Follow these steps to properly break it down:

1. Take your box and turn it upside down. Break box along the center bottom, breaking through the packing tape
2. Repeat this under the two flaps on each end of the box, freeing the tape at the edges
3. Pull all four flaps straight up, so that all edges on either end move freely up and down
4. Lightly push and twist in until the box collapses on itself, now flattened and ready to be stacked

Mejores prácticas para romper y aplanar cartón

Es una buena práctica romper el cartón para optimizar el espacio en sus contenedores y reducir la cantidad de recolecciones que requiere su negocio. Siga estos pasos para descomponerlo correctamente:

1. Toma tu caja y dale la vuelta. Romper la caja a lo largo de la parte inferior central, rompiendo la cinta adhesiva.
2. Repita esto debajo de los dos lados de cada extremo de la caja, liberando la cinta en los bordes.
3. Tire de las cuatro orillas hacia arriba, de modo que todos los bordes de cada extremo se muevan libremente hacia arriba y hacia abajo.
4. Empuje y gire ligeramente hasta que la caja se colapse sobre sí misma, ahora aplanada y lista para reciclarse.

Cardboard **IS NOT** landfill material and **MUST** be placed in recycling bin or cart.

Please put cardboard in recycling bin or cart to prevent contamination.

Styrofoam **IS NOT** recyclable and **MUST NOT** be placed in your recycling bin or cart.

Please put styrofoam in your landfill bin or cart to prevent contamination.

Thank you for your participation!

Food Waste Recycling Program

YES

Place the following items in your food waste container:

- **Food Waste**
- **Fats • Oils • Grease**
- **Food-Soiled Paper**
- **Yard Waste**

Make food waste containers easily accessible for staff.

Make sure containers are labeled correctly so staff knows what material goes in each container.

Provide training to staff (CR&R is available to assist in any training program).

NO

Do not place the following in your food waste container:

Plastic
Glass
Metal
Liquids
Polystyrene
Trash

Do not place containers out of sight for employees.

Do not overfill container.
Food waste is much heavier than regular trash.

Programa de reciclaje de desperdicios de alimentos

Sí

Coloque los siguientes elementos en su contenedor de desechos de organicos:

- **Desechos alimentarios**
- **Grasas - Aceites**
- **Papel sucio con alimentos**
- **Desechos de jardín**

Haga que los contenedores de desechos de alimentos sean fácilmente accesibles para el personal.

Asegúrese de que los contenedores estén etiquetados correctamente para que el personal sepa qué material va en cada contenedor.

Brindar capacitación al personal (CR&R está disponible para ayudar en cualquier programa de capacitación)

No

No coloque lo siguiente en su contenedor de desechos de organicos:

El Plastico

Vidrio

Metal

Liquidos

Poliestireno (Foam)

Basura

No coloque recipientes fuera de la vista de las empleadas.

No sobrellene el recipiente.
El desperdicio de alimentos es mucho más pesado que la basura normal.

Compostable and paper bags are ok.
Las bolsas compostables y de papel están bien.

FOOD WASTE

RECYCLING

STEP 1:

Bag food scraps from your kitchen into a certified compostable bag. Look for BPI logo or the term "compostable" on certified products at local retailers.

Paper bags are also acceptable.

PASO 1:

Embolse desechos de la cocina en una bolsa compostable certificada. Busque el logotipo de BPI o el término "compostable" en los productos certificados en las tiendas locales. Las bolsas de papel también son aceptables.

STEP 2:

Place bagged up food scraps into cart with the green lid. NO trash or recyclables allowed.

PASO 2:

Coloque la comida embolsada en el bote con la tapa verde. NO se permite basura o materiales reciclables.

Acceptable Items:

**Fruits, Vegetables, Dairy, Breads, Grains,
Meat, Seafood, Coffee Grounds**

Artículos aceptables:

**Frutas, Verduras, Productos Lacteos, Panes, Granos,
Carne, Mariscos, Café Molido de Grano**

When lithium-ion batteries are improperly disposed of they can cause fires in recycling centers, landfills, and collection trucks.

CONSTRUCTION & DEMOLITION

(C&D) materials are estimated to account for between 22 to 26 percent of California's waste disposal. CR&R is a leader in providing programs to meet your diversion needs.

- STATE REGULATIONS require all cities and counties to divert 65% of material generated from job sites, so it is important to document all of your project's recycling and reuse efforts. The easiest method is to have CR&R take your materials to certified facilities. CR&R is here to help you achieve the highest recycling rate possible through a variety of easy and custom tailored services.

TO START your program, please contact our Customer Service Department at 760.482.5656

CONSTRUCTION & DEMOLITION

MATERIAL RECYCLING

REDUCE YOUR WASTE DISPOSAL COSTS BY RECYCLING WITH CR&R!

RECYCLE AND REDUCE WASTE ON YOUR JOB SITE

1. PLAN AHEAD

Prior to starting your project, contact CR&R to find out what options will work best for your site. Planning ahead will assist you in diverting as much material as possible, as cost effectively as possible.

2. SOURCE SEPARATION

To source separate, you must have one container on your site for each type of material. The types of materials may include wood, concrete, asphalt, cardboard, green waste and metal. Other materials may be available to recycle as well. Please call our office for more information.

3. MIXED RECYCLING

The mixed recycling method is ideal for projects with limited space or projects generating a large amount of varied materials all at the same time. All C&D materials can be mixed into one container for processing.

4. REUSE OR DONATE

Depending on the characteristics of your project, you may have the opportunity to reuse or donate items. For example, processed concrete or asphalt may be used as part of a new foundation. Windows, doors and other fixtures may find a good home with local organizations.
